

ABM Federal is committed to helping our customers advance their goals for achieving high standards of environmental stewardship. We demonstrate this commitment through our internal promotion of environmentally sustainable best practices.

### **ABM Internal “green” practices**

#### **Our Distribution Centers:**

- Biodegradable air pillows.
- Shipping cartons manufactured using recycled material.
- Ongoing analysis and carton rationalization to ensure most efficient and correct “sizing” as it’s related to shipping cartons.
- Distribution Centers utilize energy efficient lighting.

#### **Our business practices:**

- Shifting customer invoice delivery from hardcopy to electronic delivery.
- Employing print monitoring software to identify areas where printing can be reduced or consolidated.
- Duplex printing on all internal office printing.

#### **Our facility systems and management policies:**

1. Printing
  - a. MPS (Managed Print Services)
  - b. HRIS purchased in 2010 used to minimize printing and storage of personnel files.
2. HVAC Management System
  - a. ERU- Energy Recovery Units work in tandem with our Centralized computer control of HVAC
3. Lighting Control
  - a. Time clocks and photocells, simple, reliable and cost-effective methods of controlling lighting systems.
  - b. Occupancy sensors

- c. Dimming technologies include common manual dimming switches as well as more sophisticated technology
  - d. Automated lighting management systems provide centralized computer control of lighting systems.
- 4. Water Management- sprinkler system is on a water management system including rain gauge.
- 5. Carpet is Green label plus certified.
- 6. Janitorial Supplies – Use of supplies that are certified green
