

HP Access Control Secure Authentication—Proximity Readers

If you need to control access to HP MultiFunction Printers (MFPs) and printers in your organization, install HP Access Control Secure Authentication. Users will then use their corporate proximity badge to gain access to the device functions such as email, fax, copy, or scan. No more login/password to type on the MFP front panel!

Alternative thinking about printing

Up to 1 million user badges

HP Access Control Secure Authentication is a sophisticated badge reader directly connected to the HP LaserJet MFP, combined with a software running inside the printer.

Up to 1 million users can be recognized per MFP. The badge and users list can be securely stored on every MFP hard drive or validated instantly against LDAP or Active Directory.

User self-enrollment

HP Access Control Secure Authentication features a unique self-enrollment capability, where users can enroll and de-enroll their badge on MFPs without needing any IT support.

Authenticate for MFP applications

The administrator can define MFP functions that users must show their badge to access. Upon badge number validation, the MFP recognizes the user name, login, and email address. That information is then used by the MFP application such as email sending (FROM field), copy tracking, or secure printing to reclaim the print jobs.

Authenticate for Secure Printing

On printers and MFPs, Authentication can be used with HP Access Control Secure Printing. Users can reclaim their print jobs stored on the printer or MFP disk, or on remote servers, by simply showing their badge. This feature requires the HP Access Control Secure Printing module.

Usable with all MFP functions

Authentication can apply to fax, email, copy, print jobs, scan to folder, DSS Workflow, job tracking, and many other MFP functions or solutions.

Alternate Authentication

Alternate PIN or LDAP authentication is available for users without badges.

Supported Proximity badges

HP readers are available for HID Prox, HID iCLASS, Mifare, Smartcards, and Indala badges. Please contact us for other types of badges.

System requirements

Supports most HP LaserJet printers, HP LaserJet MFPs and Digital Senders.

Package includes

HP Proximity reader, firmware module, cabling, routing adhesive brackets, user and administrator guide.

Regulation

CE and FCC Certified
WEEE and RoHS compliant
